

In-house email cost piling up?

Everyone.net powers email services for over 300,000 domains worldwide. Since 1998, our advanced email architecture has provisioned over 30 million mailboxes for national service providers such as Netscape Communications, and global corporations like Wolfgang Puck Fine Dining.

"Everyone.net is the perfect solution to exceed our communication needs. We are impressed with the administrative features, the friendly support staff and the reliability of their service. We would recommend Everyone.net to everybody!"

—Wolfgang Puck Fine Dining

World-Class Features

Everyone.net Business Mail equips your employees with essential corporate email features without the cost and complexity of large enterprise systems. Every Business Mail account features:

- **99.9% Uptime** – Unsurpassed reliability starting at just \$19.99 a month for 5 users.
- **Instant Setup** – No hardware to buy and configure. No software to license and install.
- **Easy Migration** – It's simple to switch from virtually any email system, including Exchange.
- **Spam Protection Built-in** – Business Mail features SpamShield Pro built-in, so it works no matter how you access your email without any extra software to install.
- **Anti-Virus Included** – Business Mail is integrated with industry leading Sophos Anti-Virus to protect your company from computer viruses.
- **Support For Employees** – Every Business Mail user has access to their own private helpdesk staffed by email experts.
- **1 GB per User** – More than ample storage for thousands of messages, and large file attachments.
- **Effortless and Limitless Scalability** – Hired more employees? No worries! Business Mail scales instantly with a few mouse clicks.
- **Works With All Popular Web Browsers** – Business Mail's web-based email client includes a Rich Text Editor which is compatible with most web browsers including Internet Explorer, Firefox and Safari.
- **Works With All Popular Email Programs** – Business Mail features standard Internet email protocols (IMAP, POP, and SMTP) used by Outlook, Outlook Express, Entourage, Thunderbird, Apple Mail, and others. IMAP keeps messages and folders in sync between the office, home, and on the road!
- **Treo and Other Smartphone Support** – Business Mail supports true "push" email allowing your mobile users to stay up-to-date, and fully sync their mail on the road. No need to buy and maintain tens of thousands of dollars of equipment!*
- **Shared Address Book** – Keep everyone in your company up-to-date with the latest contacts. Shared Address Book can be accessed via Web Mail, Outlook, or most any other LDAPv3 client.

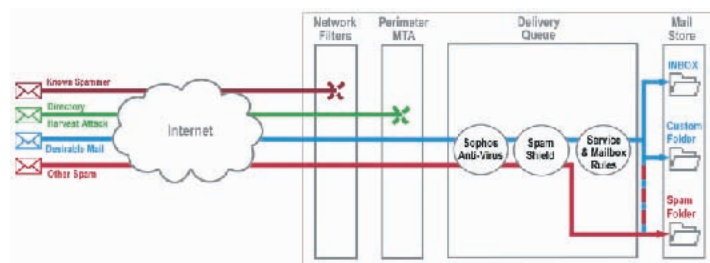

Complete Control

Everyone.net Business Mail keeps you in the driver's seat with our easy-to-use yet powerful web-based application for email provisioning and user management.

- Create, edit and remove email accounts, and email aliases.
- Search by login name, last name, and other specific criteria to find the right user fast.
- Change user passwords and update user profiles.
- Generate detailed user reports that can be imported into a database or spreadsheet such as Access or Excel.
- Customize Web Mail interface elements, layout, text, colors, fonts, images, page properties, welcome letters, storage quota limit warning letters, and more to match your corporate identity.
- Integrate the Web Mail login interface into your intranet or simply use the default page.
- Send HTML or plaintext email to all of your employees.
- Domain-level Email Rules.

Total Protection

Everyone.net Total Protection protects your business and employees from the spam and virus onslaught.

Total Protection includes:

- Hourly updates of Sophos Anti-Virus to scan incoming and outgoing mail.
- Everyone.net intelligently blocks spam attacks at the source.
- BounceShield eliminates forged returned messages.
- Automatically block by IP and file attachment type.
- Automatically move unwanted email to the Spam folder for review or to the Trash.
- Hide images with Web Mail to block offensive graphics and bugs.
- SpamShield Score message header enables SpamShield Pro for POP clients like Outlook, Outlook Express, Entourage, Thunderbird, Apple Mail, and others.
- Approved Senders list lets trusted email addresses or domains through.
- Blocked Senders list reduces messages from spammers.
- Only accept email from Approved Senders (greenlist).
- Email Rules provide advanced control and instant server-side filtering.
- 128-Bit SSL Encryption secures Web Mail, IMAP, POP, and authenticated SMTP connections.
